GOOD SCIENCE MATTERS

On another positive note. Roche announced on Friday that Actemra, a monoclonal antibody that I helped launch at Genentech lowered death rates of severely ill COVID19 patients by 23%. Actemra is an IL6 antibody. My wife has been on Actemra for 8 years. A wonder drug.

It was while I was working at Genentech in 2010 when I discovered that Bloom was a Total Fraud. Can you imagine a sleazebag like Jared Huffman not believing in the science of Genentech? This is true as the Torah is true. Huffman only believes in the "science" that propels his stinking political career.

Kevin Hessel I think it time for another Ark Article on the Bloomdoggle. Oh I forgot Huffman told Hessel of the Ark to fire me. A very Trumpian thing of a politician to do.

GREEN LIES MATTER TO GREAT SCIENTISTS NOT SLEAZY POLITICIANS

I love our Shabbat service and I listened intently to your sermon last night. Last week was a terrible week.

Donald Trump is a disgrace, but he is not the only disgrace in our Government.

In 1988 when Barbara Boxer represented us in Congress, I met with her and pleaded with her to help me to stop Methyl Tertiary Butyl Ether (MTBE) from being put into gasoline. She told me in a face to face meeting the following "I have no interest in this matter". She was the first lying hypocrite to pretend to represent us. In 2010 I met with Lynn Wolsey and presented her with real science that the energy policies of the United States were based on crony capitalism and not thermodynamics. She refused to even lift a finger. Then the sleazebag Jared Huffman took over from Lynn Wolsey and we all know he is an architect of the Bloom Energy Bloomdoggle. The BLOOMDOGGLE is the largest ecofraud of the 21st century. Theranos was the Bloom of Blood and Bloom is the Theranos of Thermodynamics.

Add that Senator Feinstein lied to me about Bloom and that Senator Murkowski loaned her man Patrick McCormick to Bloom for two years to squash the EPA fine for hazmat. I am the tipster to the EPA on the hazmat and other greenwashing by Al Gore's, Colin Powell's and John Doerr's Bloomdoggie. Patrick McCormick returned to loving arms of Murky Murkowski after working as a VP of Bloom to be the SPECIAL COUNSEL OF THE US SENATE ENERGY COMMITTEE. I expect Michael Regan who will head the EPA to clean up this mess.

Our government is corrupt from top to bottom and Joe Biden is a big part of the Bloomdoggie in Delaware where ratepayers and taxpayers have been defrauded of \$450 million in this state that only has the population of San Francisco plus Marin County.

But last week also had silver linings. Vice President Pence showed the true colors of the party of Lincoln and I together with a major NYSE company filed a provisional patent at the USPTO for the production of affordable hydrogen without any carbon dioxide emissions.

The sleazebag Huffman would not meet me face to face and told Kevin Hessel (Editor of the Tiburon Ark) and myself he "did not have four hours to waste learning thermodynamics". Having a sleazebag like Huffman on environmental committees is like having a compromised low life like Swalwell on the intelligence committee.

I have high hopes that good people like Mike Pence and perhaps John Ossoff and Michael Regan may right this ship. I have high hopes that excellent science like that I practice will improve the lives of all. I know that Thermodynamics Trumps Everything. It has since the Big Bang and will until the end of the universe as we know it.

Huffman owes all who live in the Second Congressional District a major apology for his central role in the Bloom Fraud. Diane Feinstein should just retire to the hundreds of millions of dollars her husband made by being business partners of Oligarch's like John Doerr. Huffman unlike you or me, does not believe in God so even if he apologizes it may be hollow.

God Bless America and Thank God for Vice President Pence. He is a true patriot.
